

WATEREUM

The future of water –
The water of the future

FuturAqua PLC

2

CLEAR SWEETWATER

- essential for life;
- increases in value when we offer it to a thirsty person in the desert;
- due to our modern perception of life, we can not comprehend what physiological effects are caused by its lack in the short run;
- one of the most important resources and raw materials.

3

CLIMATE CHANGE

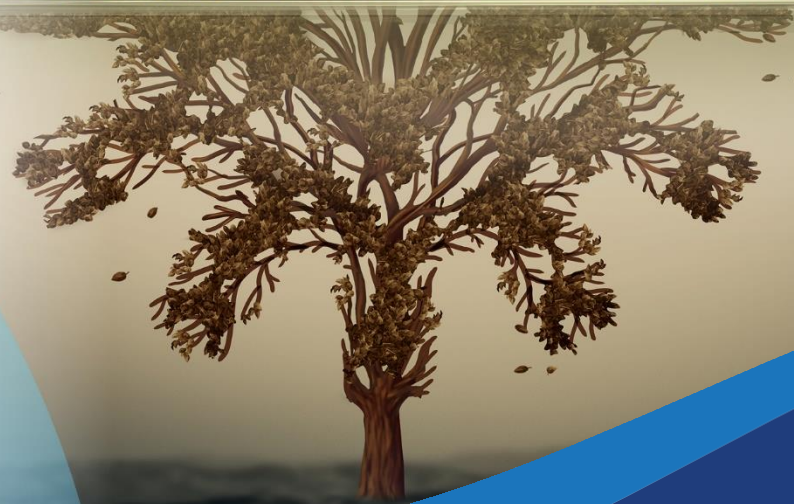

- we are already suffering from its effects;
- it can change the current environmental and living conditions in a more radical way;
- as a result, ensuring the indispensable living conditions on certain areas of our planet will not be as easy as it is today.

4

ENVIRONMENTAL LOAD AND DAMAGES

- the majority of sweet water is being used for industrial purposes around the world;
- industrial activity causes huge load and pollution on the environment;
- for example the flora and the fauna are drowning in useless plastic bottles;
- dangerous microplastic is already present in our sweet and salt waters.

5

CLIMATE CHANGE + ENVIRONMENTAL LOAD

→ SEVERE CONSEQUENCES → LACK OF LIFE-GIVING DRINKING WATER

OVERPOPULATION ON
EARTH AND THE
PROVISION OF
HUMANITY WITH
GOODS OVERLOADED
THE RESOURCES OF THE
PLANET;

CERTAINS AREAS ARE
ALREADY SUFFERING
FROM DEVASTATING
DROUGHTS;

LACK OF WATER
MIGHT BECOME AN
ISSUE IN AREAS
CURRENTLY DENSE
WITH DRINKING
WATER;

BY 2080, 2,3 BILLION
PEOPLE MIGHT
SUFFER FROM THE
LACK OF LIFE-GIVING
DRINKING WATER

6

THE LACK OF LIFE-GIVING DRINKING WATER

- By the time we reevaluate our relation to sweet water, it will already be too late to obtain water in an easy way.
- The so called entry barriers will be high – way higher than we can imagine.

7

TODAY'S CHALLENGE

- enforcing the better management of environmental resources;
- preserving clean sweet water for the future;
- creation of the „water of the future” – with responsible water management.

8

RESPONSIBLE WATER MANAGEMENT

- KEY FOR BOTH OUR PLANET AND CIVILIZATION;
- ITS EXTRAORDINARY ROLE WILL ONLY INCREASE IN THE FUTURE.

9

IDEAS EMPHASISING CONSCIOUSNESS

Emphases:

- on the ensuring of the clean air and sweet water indispensable for life;
- on restructuring how waste is created.

10

THE SOLUTION:

A dynamic splash of water in shades of blue and teal, arching over the logo. The water droplets are captured in mid-air, creating a sense of movement and freshness. The background features a large, faint circular graphic in light blue and white.

FUTURAQUA
– THE FUTURE OF
WATER
– WATER OF THE
FUTURE
– WATEREUM

12

„WATER OF THE FUTURE” = THE PROCESS OF INDIVIDUAL AND COMMUNAL PREPARATION WITH PROFESSIONAL AND TODAY’S STATE OF THE ART WATER MANAGEMENT SOLUTIONS

MAJOR GOALS INCLUDED IN THE STRATEGY OF FUTURAQUA PLC:

- CREATION OF THE FUTURE OF SWEET WATER;
- ACTIVE PARTICIPATION IN WASTE MANAGEMENT;
- OPENING UP THE GLOBALLY MANAGEABLE, WIDER ECONOMICAL PERSPECTIVES OF SWEET WATER;
- CREATING THE PLATFORM FOR THIS WITH THE INCLUSION OF BLOCKCHAIN TECHNOLOGY AND THE WATEREUM TOKEN.

14 THE WATEREUM TOKEN

- NEW AND UNIQUE HUNGARIAN DEVELOPMENT;
- BASED ON THE ETHEREUM ERC-20 BLOCKCHAIN-TECHNOLOGY;
- 1 UNIT OF WATEREUM = ACCESS TO 1 LITER OF WATER
- CAN BE USED ANYTIME.

The logo for Waterereum features a stylized 'WM' monogram in white, with the 'W' and 'M' overlapping. Below the monogram, the word 'WATEREUM' is written in a bold, white, sans-serif font. The background of the slide is a dark blue gradient with a network of glowing blue nodes and lines, suggesting a blockchain or digital network.

WATEREUM

15 INDIVIDUAL GOALS REALIZED THROUGH WATEREUM:

- Organized on the bases of individual interest – ownership of individual permission guarantees the availability of the pre-engaged water mass necessary for existence and management.
- Validating the economical profit coming from the changes in value of the water mass.
- Its current value is easy to define, its future value is unchanged regarding the initial amount.
- Owner of the token, the FuturAqua PLC creates a community of values through itself:
 - it provides individual advantages with highly secure coverage;
 - at the same time, it supports the ongoing innovation of the field – kind of generating the further value creation of its own permission.

16 COMMUNITY GOALS REALIZED THROUGH WATHEREUM:

- Global community for the preservation of water resources – by responsible , economical and waste-free water-management through the utilization of blockchain technology.
- Permissions necessary for life (air, water, food) will become equal with the security investments of today (gold, silver).
